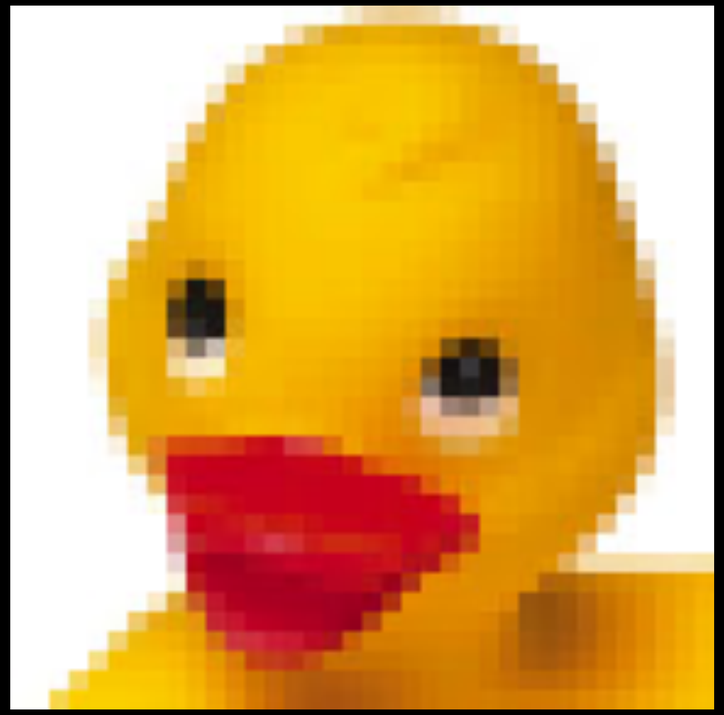
150 dpi

300 dpi

300dpi



72dpi

300dpi BUT
enlarged from previous

1

This artwork is excellent for printing

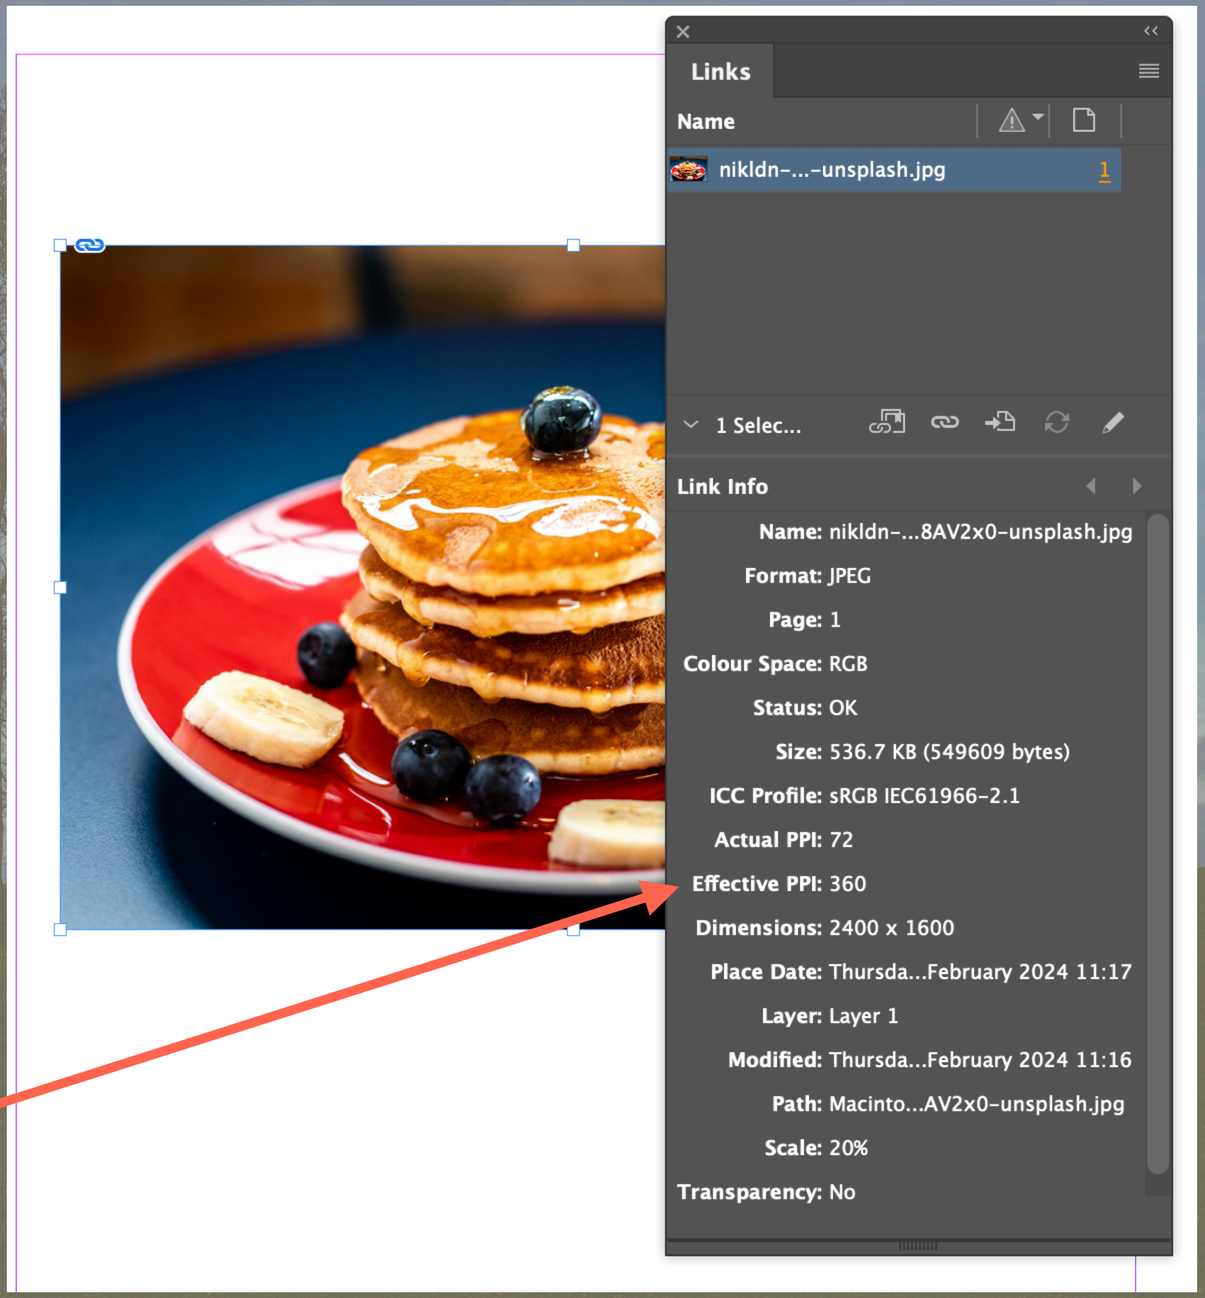
2

Compared to the first flyer, this version has a lower resolution and contains areas of pixelation

3

Unfortunately, this design is of the lowest quality and is not suitable for print. It suffers from heavy pixelation, making the text illegible.

Images placed into **InDesign** should be a minimum of **250ppi**



Effective is what counts

Colour

Color

Screen Primary Colours
